BIF5-SWEN3		Semester-Project/Code-Review Rating Matrix Midterm			
			Team:	**Group L**	
			Student:	**Mayer Lukas, Radic Ivo, Veigel David**	
			Date:		
				https://github.com/SwipSwup/PAPERLESS_DV_LM_IR	
	Title	**Description**	**Max.**	**Points**	**Notes**
Functional-Requirements (20%):					
	Use Cases	Understanding and Implementation of use-cases	5	**4**	
	REST API	Implementation of service-layers, converters, service-agents	5	**5**	
	Web-Frontend	UX and completeness (functionallity) of web frontend	5	**4**	
	additional Use Case		5	**4**	
Non-Functional-Requirements:					
	Queues	Implementation of async-communication between components	4	**4**	
	Logging	Appropriate logging implemented in all components/layers	2	**2**	
	Validation	Validation in all layers and components	2	**2**	
	Stability Patterns	Exception handling, layer-based exceptions, stability patterns implemented	2	**2**	
	Unit Tests	Implementation of Unit-Tests with Mocking and appropriate coverage	4	**2**	
	Integration Tests	End2End Tests of use-cases and critical paths	4	**3**	
	Clean-Code	SOLID principles, clean-code for high code quality used	2	**2**	
Software Architecture:					
	Packaging	Packaging and project-setup with containers (docker-compose, configs correct)	10	**10**	
	Loose Coupling	Implementation of interfaces, lose coupling	2	**2**	
	Mapper	Mapping between layers, usage of mapping framework	2	**2**	
	Dependency Injection	DI implemented, DI framework used	2	**2**	
	DAL	Implementation of persistence with ORM and Repository-Pattern (evtl. Unit-Of-W	2	**2**	
	BL	Implementation of BL, entities, workflow, facade	2	**2**	
Software Development Workflow:					
	GitFlow	GitFlow based; branches used; pull-requests used	5	**2**	
	Issue Tracking	form of issue-tracking, kanban-board used and actual	5	**1**	
	CI/CD-pipelines	some sort of CI/CD automation used (e.g. GitHub Action), for test, linting,..	5	**5**	
	Documentation	critical aspects of the solution are documented (diagrams, README.md)	5	**4**	

Code-Review (questions):							
	Knowledge	Knowledge of the WHY/HOW/WHERE in the code. Able to explain the background (theoretical) concepts	20	**20**			
		Total (in %):	**100**	**86**			

Remarks:

- The score here is in percent and will be scaled to the max-points of the code-review in Moodle
  e.g. Mid-Term Code-Review 100% → 25 points; Final Code-Review 100% → 40 points
- You will get part score per item, if the task is not implemented complete or source quality is low
